### CISMO – Your reliable partner in the energy and environmental market

The changes in the energy and environmental market make it necessary to master demanding and complex tasks. CISMO GmbH offers its support in the following areas:

- Know-how based on its own experience in the area of deregulated markets.
- Services in the area of energy deregulation and market models.
- Process definition and implementation for the deregulated energy and emissions market.
- Delivery of the required IT such as clearing, auction, registration and cash settlement and risk management systems.
- Availability of a qualified network of highly specialized IT companies and banks.

We know what it means to be in a constant process of innovation and development, but still remain capable of performing. We will gladly support you in finding innovative solutions.

### How Clearing and Markets work

#### CISMOgroup – Added value through joint ventures

If it is clear that a partnership would be reasonable for strategic and economic reasons, CISMO sets up joint ventures with its customers. These ventures form the CISMOgroup – an alliance of companies that benefit from the energy know-how and resource pool of CISMO.

All renowned Austrian natural gas and electricity companies as well as Austrian banks and major industrial companies from Austria own shares in the companies of the CISMOgroup. This network forms one of the solid pillars of the CISMOgroup.
